

Dr. Elaine Margarita will share updates regarding FLES on Long Island. A brief history of how FLES flourished in our local school districts and a look at the future will be examined; in particular, ways to advocate for, implement, and support successful FLES programs will be presented.

Research on FLES will be shared to bring back to your school community in order to promote FLES to parents and administrators. Ideas, strategies and resources will be highlighted.

Elaine will also distribute information for Long Island Language Teachers who are interested in obtaining the certification to teach world languages in grades K-6.

CTLE certificates will be available to our members who attended. Join us at this very exciting event to start the new school year!
